Turn Every Cloud Dollar Into ROI

Embedding FinOps Culture in Engineering

C3Ops

FinOps-Driven DevOps Platform

Stop wasting cloud costs.
Start with what matters most to your CFO.

Cost Optimisation First
Then Scale with CMDB, Automation & Security

The Cloud Cost Crisis

Your cloud bill keeps growing, but where is the money going?

C3Ops
FinOps-Driven DevOps Platform

Common Pain Points

- Cloud costs increasing **30%-50%** annually with no visibility
- **Engineering** teams disconnected from financial impact
- Idle resources running **24/7** with no accountability
- Over-provisioned infrastructure "**just to be safe**"
- No clear **ownership** of cloud spending by team/project

The Real Cost

Organizations waste **30%-40%** of their cloud spend on unused, over-provisioned, or unoptimized resources

What if you could:

- Cut cloud costs by **25%-40%** in 90 days
- Give every team visibility into their spending
- Automate cost optimization continuously

C3Ops Cost Optimization Approach

FinOps embedded into your DevOps pipeline

C3Ops
FinOps-Driven DevOps Platform

Assess

Deep-dive analysis of your cloud spend patterns

- Resource utilization audit
- Cost allocation review
- Waste identification
- Quick-win opportunities

Optimize

Implement cost-saving measures with zero disruption

- Right-sizing instances
- Reserved capacity planning
- Automated scheduling
- Storage optimization

Govern

Embed FinOps culture for sustained savings

- Cost tagging standards
- Team accountability dashboards
- Budget alerts & policies
- Continuous optimization

The C3Ops Difference

✓ Results in 90 days, not 9 months
✓ No disruption to engineering velocity
✓ FinOps mindset embedded in DevOps
✓ Sustainable, not one-time savings

Proven Results That Impact Your Bottom Line

Real outcomes from our cost optimization engagements

C3Ops
FinOps-Driven DevOps Platform

25% - 40%
Cost Reduction

Average cloud spend reduction achieved within first 90 days through waste elimination and right-sizing

100%
Cost Visibility

Full transparency into where every dollar goes - by team, project, and environment

Additional Benefits

60% Reduction in idle resources	**90 days** To measurable ROI	**24/7** Automated optimisation

Real Example: A mid-size SaaS company saved $450K annually by eliminating zombie resources and right-sizing compute instances

Your 90-Day Cost Optimization Journey

A proven roadmap to sustainable cloud savings

C3Ops
FinOps-Driven DevOps Platform

1

Week 1-2: Discovery & Quick Wins

- Comprehensive cloud spend analysis
- Identify immediate cost-saving opportunities
- Tag existing resources for visibility
- Deliver first savings (typically 10% - 15%)

2

Week 3-6: Optimization Implementation

- Right-size compute resources based on usage
- Implement automated scheduling for non-prod
- Storage tiering and lifecycle policies
- Reserved capacity recommendations

3

Week 7-12: Governance & Culture

- Team-level cost dashboards and accountability
- Budget alerts and guardrails
- FinOps training for engineering teams
- Continuous optimization playbooks

What Sets C3Ops Apart

Zero disruption to production systems

Results visible within first 2 weeks

FinOps embedded in DevOps practices

Sustainable culture change, not just savings

Start Your Cost Optimization Journey Today

Your cloud is costing too much. Let's fix it.

C3Ops
FinOps-Driven DevOps Platform

Free Cloud Cost Assessment

Get a detailed analysis of your cloud spending with concrete savings opportunities - no commitment required

What You'll Get:

✓ Detailed spend breakdown by service & team
✓ Immediate cost-saving opportunities identified
✓ Projected savings estimate
✓ 90-day optimisation roadmap
